The purpose of education is to make good human beings with skill and expertise... Enlightened human beings can be created by teachers. Creativity is seeing the same thing but thinking differently.

From the Principal's desk...

Dear Students,

Schooling is our first contact with the world, a period of joy, healthy competition, fearing, adjustment, sharing and love.

According to academic analysts, the youth of future generation are going to be more prone to violence and deviant behavior. This deteriorating trend is a matter of great concern to parents as well as teachers.

Learning is not a process limited to schools and colleges only, nor does it end with the conclusion of one's school career. It is indeed a lifelong process. This school is oriented to the total formation of a child and to adaptations of various methods suiting the dynamics of changing world in order to achieve common goals and objectives.

Dear students, it is my message to you all that **the people of fine character live by their values.** They are honest and are committed to truthfulness in thought, word and deed.

Character creates self-respect, which in turn leads to high self-esteem. Maturity is reflected in all aspects of character –the decision We Make, the friends we choose and the responsibilities we accept. Always remember to uphold the dignity of people. Be always ready to give preference to other. **What you are is god's gift to you. What you become is your gift to God.**

“With warm wishes and God's blessings”
