FEBRUARY

SRIPERUMBUDUR

2024

Mr. A. Lourdasamy Antony

A dedicated and highly qualified faculty ensures a classroom experience that encourages research and critical thinking. I am also deeply proud of the strong values that our students imbibe from our vision of excellence, a vision recorded through core qualities of compassion and sensitivity both for their peers and for the world at large.

Students are also encouraged to think critically on issues of Climate Change and the Anthropocene in order to create resolutions and beneficial changes that they could incorporate in their lived lives, as well as those that can bring about structural change. Our efforts are aimed at leveraging the intellectual and emotional capabilities of our vibrant student community. We encourage this through the free and spirited exchange of ideas that celebrate ideals of inclusivity in diversity, acceptance and freedom.

At SJRS we value academic integrity and accountability and aim to create open and transparent systems that we deliver through administratively as well. In all this we train our students to also remain sensitive to social responsibilities and ethical choices, so that they respond to those around them with care and kindness. This we know is possible only through a collaborative, shared, and consultative work environment that we help foster through our teaching-learning in the classroom, in the sports field and in our co-circular spaces.

The school is striving hard to make the best possible efforts to inculcate strong values combining with academics and extra-curricular activities in the children

“We want that education by which character is formed, strength of mind is increased, the intellect is expanded, and by which one can stand on one’s own feet” – Swami Vivekananda

Sr. Arul Jeyanthi
Campus Superiors

“Success is not how high you have climbed, but how you make a Positive difference to the world.” - Roy T. Bennett

To excel in school activities like Academics, Arts and Sports is something that is encouraged and supported. Every parent and child looks forward to acknowledgment and admiration, and so a keen effort is always made to gain recognition.

One wants to be better than the others to prove one self. Our competitor is always the other. However, we will rise to further heights if we begin to compete with ourselves. Competing with ourselves will help raise our own personal bar of perfection thereby instilling within us a confidence that will make us a winner in every way. Compassion and kindness must be shown towards all for it is rightly said that in helping others we shall help ourselves, for whatever good we give out completes the circle and comes back to us. So dear students, let us strive not only towards academic excellence but also towards being the kind of person who will be the embodiment of **kindness, trustworthiness, responsibility, optimism and self control.**

We pride ourselves on creating a culture of learning where students are free to express or share their interest in variety of fields while developing their character as well. Delayed Gratification, Integrity, Civic Consciousness and the Willingness not to give up, these are the values that we seek to inculcate in our students. With Extra-Curricular Classes, a strong emphasis on communication skills and activities to foster cultural understanding, the students of our school emerges as elucidated and responsible citizen of the world.

The parents are the most strengthening power in molding the future of children. Their consistent support empowers us to do more and more. I pay my gratitude to them for their faith in us.

I am confident enough that the Innocents will make themselves stronger day by day, adding a new leaf to the grandeur of the school.
